EV Charging Best Practice Workshop

As electric vehicles and home charging become increasingly popular, it is vital that we can spot new forms of energy theft.

The UKRPA is hosting a EV Charging Best Practice Workshop on Thursday 20th January 2022 to understand how upcoming technologies might be susceptible to theft, review how consumer vulnerability should be considered and how the industry should seek to recover losses.

Guest speakers will include Kevin House from Capgemini, Michael Anten and Gavin Hammer from British Gas and Martyn Allen from Electrical Safety First.

The workshop will be collaborative with the intention for the UKRPA progress any outputs from the meeting to ensure we are part of the conversation and can promote best practice in this new and valuable area.

The workshop is available to non-Members and will be [CPD Certified](#).

Please contact the [Secretary](#) for registration.
