

A MAKEOVER FOR THE NEW YEAR

LEARN MORE ABOUT THE NEW UKRPA LOGO

Welcome to our last Newsletter of 2023! As you may have noticed, the UKRPA logo has had a slight makeover. It has now the following tagline:

Reduction – Prevention – Awareness
Combating energy theft & protecting communities

As the UKRPA has built awareness of the dangers of energy theft over the years and continues to do so in all its activities – notably throughout its social media channels – it is only natural that its logo better reflects the core objectives of the association. Although Revenue Protection is a well-known term within the industry, it is no longer used by the REC and other industry parties. It has also crystallised tensions with the public recently in view of the energy crisis, the spreading of misinformation online and the persistent Freeman on the Land movement.

By having a clearer distinction from debt related activities, the UKRPA aims to move away from any stigma associated with the focus on debt recovery and instead emphasise the association's commitment to safety and energy theft awareness.

The UKRPA is a well-established association that has a strong presence. Therefore, representing its focus on safety, illegality and theft through its brand's most visible element ensures that most people the UKRPA interacts with, such as industry parties during its events, councils and housing associations through its energy theft awareness training, and the wider public through its helpline, have a clear view of our mission.

Combating energy theft and protecting communities is at the forefront of what we do. Our new logo will help spread that message.

Francine Peyroux-Sissoko, UKRPA Consultant
